Title: Outrunner  
Genre: Action, Adventure, Casual, Indie  
Developer:  
Outcorp  
Publisher:  
Chess no choke games  
Franchise:  
Outrunner  
Release Date: 12 Apr, 2017

a09c17d780

**Minimum:**

**OS:** Win Xp, Vista, 7 or higher

**Processor:** 1Ghz or faster

**Memory:** 1024 MB RAM

**Graphics:** Any

**Storage:** 260 MB available space

**Sound Card:** Any

English,Russian

---

If you consider everything that we have on steam, pombotroll is on average.  
Good work steam.

Best regards,

Mineirinho ultra adventures fan.. This game is surprisingly OK for a clearly amateur effort. It's not a very polished game, but at least it successfully avoids a lot of traps other indie games tend to all into. For example, a lot of novice developers make turn-based combats extremely slow due to long, unskippable animations, which quickly tire the player, but persist in making the game slower. Here, the animations are long, but at least there is an option to speed them up, which makes the combat much more fluid (although it seems to me it works somewhat inconsistently, with some animations not being sped up, but those are few and far between).

Also, I liked the non-linear nature of heroes' abilities. There is clearly some thought behind them: a lot of side-effects or conditional effects make the game much more interesting than the generic "X damage for Y mana" fireballs. Not all abilities are equally usefull, but you will find that the different combat situations call for different pattern of abilities to be used, which is very, very good.

Now, for some less well-done parts. Economy feels rudimentary. It is there, but it don't feel like an interesting part of the game. Character equipment is boring and feels like a slapped-on feature without any depth. This is mainly because you can't actually choose equipment for you characters: they just wear everything you buy/find, getting additive bonuses. It's a simply system - maybe too simple for my tastes. If the same amount of thought that went into abilities design went into equipment, the game would be better off.

The combat is relatively difficult, even on Easy difficulty, so you won't be too bored even by the end of the game. The final battle is done competently, if not brilliantly. At least, it's much more fun than the disaster at the end of Dragon Age: Inquisition :)

The graphics are nothing to write home about, but for such a small team this could be forgiven easily. At least, there are no major problems with contrast or colors. Using more-or-less appropriate locations for all encounters is a nice touch - props to the developers for taking time to create a large enough set of combat maps.

All in all, this is an OK game which I recommend to get if you need a diversion for a few days.

P.S. I did not play The Darkest Dungeon, so I can't comment on similarities between these two games, but from the description, they seem quite different.. Game was creepy as hell, But pretty fun i'd recommend trying to =D. This game is awesome!  
I hate spiders since I was a kid - time for revenge with Glow ;-)  
Even the first levels are fun, but there is much more coming the longer you play.  
Thumbs up!. expected more torture. but it's free so there's nothing to lose... Simply... awesome, My favourite game is Hotline Miami... and, A COMIC?!

Its fantastic try to join 1 and 2... simply awesome.. So far this is after one game - I'll update if anything is different after further games. This is to the ancient game HnefTafl what Battle Chess is to Chess. It gives a game played like HnefTafl with some variations on what you choose for special pieces, table, etc, but gives you little animated battles between the pieces. However it is from the same time period as the original Battle Chess so very pixelated and at times difficult to see clearly on a modern screen. But I enjoyed the game and appreciate having a Battle Chess version of this ancient game as well. I look forward to trying it more.

I would recommend this for those interested in games like Battle Chess that don't mind the aged graphics and it running in Dosbox.. <https://youtu.be/pyVJ8s1enl0>

This game is not for those looking for a blast of fast instant action. The focus is totally on commanding and controlling your two fire teams. The shooting and action is very much in second place. In fact you don't actually do any shooting directly - you give an order when and where to fire, and your units start shooting. Not once will you directly engage a hostile with your own

---

weapons.

As is the way with many of these older games, don't expect an easy ride. Saving is checkpoint based only, and if you get a troop killed at any time, then it is back to the last checkpoint. And you have to activate the checkpoints manually so if you miss it, or forget, then it is back to the checkpoint from before that.

I hear a lot of people complain about the interface, but in all honesty it is well thought out and works well for this style of game, and luckily there is a full tutorial that will allow you to get the hang of it before getting stuck into the campaign proper.

So all in all, there is little else out there that allows you this level of command and control and for that reason alone makes it worth a play but be warned the game requires patience and can be brutally punishing in some places.

---

Сука Блять!. This is a 1993 Point&Click adventure featuring a stuffed animal and baking cake. MY GOD this was cute. Well you can see every pixel and every frame of animation with your 60fps 1080p spoiled eyes, but it astoundingly holds up really well! The piece is timeless, it is charming, it is well suited for preschoolers and will entertain your child while maybe even teaching him or her how to bake a cake.

Fatty bear should be revived. He is a charming, innocent personality and should teach more children more stuff via P&C adventures.

I want to see an HD remake of this.

Follow my curator at. You bet I'm recommending this game, too.

10/10 great sequel love the protagonist. While not as good as other budget/bad reviews FPS games like Chaser and Clive Barker's Jericho, this "budget" FPS is pretty good and I recommend it to anyone that also like the other 2 games I mention above. Just don't expect this to be "as great" .. i dont like this kind of game but this game is totally make me 3ggered or i've forgot on MLG mode (eating doritos & mountaindew) ♥♥♥♥ing approved. <https://youtu.be/atsxTcEmJcE>

A load of mechanics and systems are put into this co-op brick breaker but at the cost of the diluting the basic gameplay which results in a sub-optimal end product.. Ungodly weapon spread makes this game more about spraying than actually aiming. A cute little experience that places you in the position of a trainee wizard, under the tutelage of a quippy talking skull. Since it's free there's no reason not to recommend, it runs fine so there's no issues with optimisation or motion sickness. The concept itself is intriguing, although I do wish there was more to it - I feel like more features would be very beneficial, at which point I'd probably be okay with paying for the game.

#### **Its discounts time!:**

Hey, check out this games!
